Index for Volume 40

This annual index is organized by first author and by title. Page numbers refer to the following issues:

Number 1 (January): 1–80, Number 2 (March): 81–176, Number 3 (May): 177–264,
Number 4 (July): 265–360, Number 5 (September): 361–476, Number 6 (November): 477–596

Author Index

Al-Aidroos, N., Fischer, M. H., Adam, J. J., & Pratt, J. *Structured Perceptual Arrays and the Modulation of Fitts's Law: Examining Saccadic Eye Movements*, 155–164.

Astill, S., & Utley, A., *Coupling of the Reach and Grasp Phase During Catching in Children With Developmental Coordination Disorder*, 315–323.

Barrett, R., Noordegraaf, M. Vonk, & Morrison, S., *Gender Differences in the Variability of Lower Extremity Kinematics During Treadmill Locomotion*, 62–70.

Bhatt, T., & Pai, Y.-C., *Immediate and Latent Interlimb Transfer of Gait Stability Adaptation Following Repeated Exposure to Slips*, 380–390.

Bo, J., Bastian, A. J., Contreras-Vidal, J. L., Kagerer, F. A., & Clark, J. E., *Continuous and Discontinuous Drawing: High Temporal Variability Exists Only in Discontinuous Circling in Young Children*, 391–399.

Cavalcanti Garcia, M. A., Domingues Vargas, C., Nogueira de Souza, M., Aureliano Imbiriba, L., & Fernandes de Oliveira, L., *Evaluation of Arm Dominance by Using the Mechanomyographic Signal*, 83–89.

Chohan, A., Verheul, M. H. G., Van Kampen, P. M., Wind, M., & Savelsbergh, G. J. P., *Children's Use of the Bearing Angle in Interceptive Actions*, 18–28.

Choi, Y., Qi, F., Gordon, J., & Schweighofer, N., *Performance-Based Adaptive Schedules Enhance Motor Learning*, 273–280.

Christou, E. A., & Rodriguez, T. M., *Time but not Force is Transferred Between Ipsilateral Upper and Lower Limbs*, 186–189.

Crespo, L. M., & Reinkensmeyer, D. J., *Haptic Guidance Can Enhance Motor Learning of a Steering Task*, 545–556.

Danna-Dos-Santos, A., Degani, A. M., Zatsiorsky, V. M., & Latash, M. L., *Is Voluntary Control of Natural Postural Sway Possible?*, 179–185.

de Bruin, N., Sacrey, L.-A. R., Brown, L. A., Doan, J., & Whishaw, I. Q., *Visual Guidance for Hand Advance but Not Hand Withdrawal in a Reach-to-Eat Task in Adult Humans: Reaching Is a Composite Movement*, 337–346.

Gautier, G., Thouvarecq, R., & Larue, J., *Influence of Experience on Postural Control: Effect of Expertise in Gymnastics*, 400–408.

Golomer, E., Bouillette, A., Mertz, C., & Keller, J., *Effects of Mental Imagery Styles on Shoulder and Hip Rotations During Preparation of Pirouettes*, 281–290.

Guillot, T. S., Asress, S. A., Richardson, J. R., Glass, J. D., & Miller, G. W., *Treadmill Gait Analysis Does Not Detect Motor Deficits in Animal Models of Parkinson's Disease or Amyotrophic Lateral Sclerosis*, 568–577.

Hammond, G., & Gunasekera, S., *Production of Successive Force Impulses by the Left and Right Hands*, 409–416.

Heuer, H., & Hegele, M., *Adaptation to a Nonlinear Visuomotor Amplitude Transformation With Continuous and Terminal Visual Feedback*, 368–379.

Holmes, P., and Calmels, C., *A Neuroscientific Review of Imagery and Observation Use in Sport*, 433–445.

Kritikos, A., McNeill, J., & Pavlis, A., *Temporal Dissociation Between Distractors and Targets: The Impact of Residual Distractor Processing on Target Responses*, 29–42.

Lee, T. D., Ishikura, T., Kegel, S., Gonzalez, D., & Passmore, S., *Head–Putter Coordination Patterns in Expert and Less Skilled Golfers*, 267–272.

Levin, O., Forner-Cordero, A., Li, Y., Ouamer, M., & Swinnen, S. P., *Evidence for Adaptive Shoulder-Elbow Control in Cyclical Movements With Different Amplitudes, Frequencies, and Orientations*, 499–515.

Liebermann, D. G., Krasovsky, T., & Berman, S., *Planning Maximally Smooth Hand Movements Constrained to Nonplanar Workspaces*, 516–531.

Lin, C. H. J., Fisher, B. E., Winstein, C. J., Wu, A. D., & Gordon, J., *Contextual Interference Effect: Elaborative-Processing or Forgetting–Reconstruction? A Post Hoc Analysis of Transcranial Magnetic Stimulation–Induced Effects on Motor Learning*, 578–586.

Lopresti-Goodman, S. M., Richardson, M. J., Silva, P. L., & Schmidt, R. C., *Period Basin of Entrainment for Unintentional Visual Coordination*, 3–10.

Louis, M., Guillot, A., Maton, S., Doyon, J., & Collet, C., Effect of Imagined Movement Speed on Subsequent Motor Performance, 117–132.

Magnuson, C. E., Robin, D. A., & Wright, D. L., *Motor Programming When Sequencing Multiple Elements of the Same Duration*, 532–544.

Masters, R. S. W., Poolton, J. M., Maxwell, J. P., & Raab, M., *Implicit Motor Learning and Complex Decision Making in Time-Constrained Environments*, 71–79.

Minvielle-Moncla, J., Audiffren, M., Macar, F., & Vallet, C., *Overproduction Timing Errors in Expert Dancers*, 291–300.

Moisello, C., Bove, M., Huber, R., Abbruzzese, G., Battaglia, F., Tononi, G., & Ghilardi, M., Felice, *Short-Term Limb Immobilization Affects Motor Performance*, 165–173.

Neely, K. A., Binsted, G., & Heath, M., *Egocentric and Allocentric Visual Cues Influence the Specification of Movement Distance and Direction*, 203–213.

O'Brien, J. C., Williams, H. G., Bundy, A., Lyons, J., & Mittal, A., *Mechanisms That Underlie Coordination in Children With Developmental Coordination Disorder*, 43–61.

Pepping, G.-J., & Li, F.-X., *The Role of Haptic Exploration of Ground Surface Information in Perception of Overhead Reachability*, 491–498.

Prodoehl, J., Corcos, D. M., Leurgans, S., Comella, C. L., Weis-McNulty, A., & MacKinnon, C. D., *Changes in the Relationship Between Movement Velocity and Movement Distance in Primary Focal Hand Dystonia*, 301–313.

Redding, G. M., & Wallace, B., *Intermanual Transfer of Prism Adaptation*, 246–262.

Reilly, D. S., van Donkelaar, P., Saavedra, S., & Woollacott, M. H., *Interaction Between the Development of Postural Control and the Executive Function of Attention*, 90–102.

Repp, B.H., *Perfect Phase Correction in Synchronization With Slow Auditory Sequences*, 363–367.

Rosenbaum, D. A., & Gaydos, M. J., *A Method for Obtaining Psychophysical Estimates of Movement Costs*, 11–17.

Rosey, F., Golomer, E. M. E., & Keller,

Title Index

Adaptation to a Nonlinear Visuomotor Amplitude Transformation With Continuous and Terminal Visual Feedback, *Heuer, H., & Hegele, M.*, 368–379.

Bilateral Associations of Low-Level Unilateral Performance: An Unremarked Aspect of Limb Control, *Vucetic, A., Holmes, M., Adams, R., & Waddington, G.*, 479–483.

Changes in the Relationship Between Movement Velocity and Movement Distance in Primary Focal Hand Dystonia, *Prodoehl, J., Corcos, D.M., Leurgans, S., Comella, C. L., Weis-McNulty, A., & MacKinnon, C. D.*, 301–313.

Children's Use of the Bearing Angle in Interceptive Actions, *Chohan, A., Verheul, M. H. G., Van Kampen, P. M., Wind, M., & Savelsbergh, G. J. P.*, 18–28.

Constrained Motor-Perceptual Task in Infancy: Effects of Sensory Modality, *Tiernan, C. W., & Angulo-Barroso, R. M.*, 133–142.

Continuous and Discontinuous Drawing: High Temporal Variability Exists Only in Discontinuous Circling in Young Children, *Bo, J., Bastian, A. J., Contreras-Vidal, J. L., Kagerer, F. A., & Clark, J. E.*, 391–399.

Contextual Interference Effect: *Elaborative-Processing or Forgetting–Reconstruction?* A Post-Hoc Analysis of Transcranial Magnetic Stimulation–Induced Effects on Motor Learning, *Lin, C. H. J., Fisher, B. E., Winstein, C. J., Wu, A. D., & Gordon, J.*, 578–586.

Coordination of a Discrete Response With Periodic Finger Tapping: Additional Experimental Aspects for a Subtle Mechanism, *Wachter, C., Cong, D. K., Staude, G., & Wolf, W.*, 417–432.

Coupling of the Reach and Grasp Phase During Catching in Children With Developmental Coordination Disorder, *Astill, S., & Utley, A.*, 315–323.

Effect of Imagined Movement Speed on Subsequent Motor Performance, *Louis, M., Guillot, A., Maton, S., Doyon, J., & Collet, C.*, 117–132.

Effects of Mental Imagery Styles on Shoulder and Hip Rotations During Preparation of Pirouettes, *Golomer, E., Bouillette, A., Mertz, C., & Keller, J.*, 281–290.

Egocentric and Allocentric Visual Cues Influence the Specification of Movement Distance and Direction, *Neely, K. A., Binsted, G., & Heath, M.*, 203–213.

Evaluation of Arm Dominance by Using the Mechanomyographic Signal, *Cavalcanti Garcia, M. A., Domingues Vargas, C., Nogueira de Souza, M., Aureliano Imbiriba, L., & Fernandes de Oliveira, L.*, 83–89.

Evidence for Adaptive Shoulder-Elbow Control in Cyclical Movements With Different Amplitudes, Frequencies, and Orientations, *Levin, O., Forner-Cordero, A., Li, Y., Ouamer, M., & Swinnen, S. P.*, 499–515.

Extracting Global and Local Dynamics From the Stochastics of Rhythmic Forearm Movements, *van Mourik, A. M., Daffertshofer, A., & Beek, P. J.*, 214–231.

Extroversion-Related Differences in Speed of Premotor and Motor Processing as Revealed by Lateralized Readiness Potentials, *Stahl, J., & Rammsayer, T.*, 143–154.

Eye Movements Drive Steering: Reduced Eye Movement Distribution Impairs Steering and Driving Performance, *Wilson, M., Chattington, M., & Marple-Horvat, D. E.*, 190–202.

Gender Differences in the Variability of Lower Extremity Kinematics During Treadmill Locomotion, *Barrett, R., Vonk Noordegraaf, M., & Morrison, S.*, 62–70.

Haptic Guidance Can Enhance Motor Learning of a Steering Task, *Crespo, L. M., & Reinkensmeyer, D. J.*, 545–556.

Head–Putter Coordination Patterns in Expert and Less Skilled Golfers, *Lee, T. D., Ishikura, T., Kegel, S., Gonzalez, D., & Passmore, S.*, 267–272.

Immediate and Latent Interlimb Transfer of Gait Stability Adaptation Following Repeated Exposure to Slips, *Bhatt, T., & Pai, Y.-C.*, 380–390.

Implicit Motor Learning and Complex Decision Making in Time–Constrained Environments, *Masters, R. S. W., Poolton, J. M., Maxwell, J. P., & Raab, M.*, 71–79.

Influence of Experience on Postural Control: Effect of Expertise in Gymnastics, *Gautier, G., Thouvarecq, R., & Larue, J.*, 400–408.

Interaction Between the Development of Postural Control and the Executive Function of Attention, *Reilly, D. S., van Donkelaar, P., Saavedra, S., & Woollacott, M. H.*, 90–102.

Intermanual Transfer of Prism Adaptation, *Redding, G. M., & Wallace, B.*, 246–262.

Is Voluntary Control of Natural Postural Sway Possible?, *Danna-Dos-Santos, A., Degani, A. M., Zatsiorsky, V. M., & Latash, M. L.*, 179–185.

Mechanisms That Underlie Coordination in Children With Developmental Coordination Disorder, *O'Brien, J. C., Williams, H. G., Bundy, A., Lyons, J., & Mittal, A.*, 43–61.

A Method for Obtaining Psychophysical Estimates of Movement Costs, *Rosenbaum, D. A., & Gaydos, M. J.*, 11–17.

Motor Programming When Sequencing Multiple Elements of the Same Duration, *Magnuson, C. E., Robin, D. A., & Wright, D. L.*, 532–544.

Multifinger Prehension: An Overview, *Zatsiorsky, V. M., & Latash, M. L.*, 446–475.

A Neuroscientific Review of Imagery and Observation Use in Sport, *Holmes, P., and Calmels, C.*, 433–445.

Oscillations in Motor Priming: Positive Rebound Follows the Inhibitory Phase in the Masked Prime Paradigm, *Sumner, P., & Brandwood, T.*, 484–489.

Overproduction Timing Errors in Expert Dancers, *Minvielle-Moncla, J., Audiffren, M., Macar, F., & Vallet, C.*, 291–300.

Perfect Phase Correction in Synchronization With Slow Auditory Sequences, *Repp, B.H.*, 363–367.

Performance-Based Adaptive Schedules Enhance Motor Learning, *Choi, Y., Qi, F., Gordon, J., & Schweighofer, N.*, 273–280.

Period Basin of Entrainment for Unintentional Visual Coordination, *Lopresti-Goodman, S.M., Richardson, M.J., Silva, P. L., & Schmidt, R.C.*, 3–10.

Planning Maximally Smooth Hand Movements Constrained to Nonplanar Workspaces, *Liebermann, D. G., Krasovsky, T., & Berman, S.*, 516–531.

Precocity of Fine Motor Control and Task Context: Hitting a Ball While Stepping, *Rosey, F., Gololomer, E. M. E., & Keller, J.*, 347–357.

Production of Successive Force Impulses by the Left and Right Hands, *Hammond, G., & Gunasekera, S.*, 409–416.

Reinforcement of Wheel Running in Balb/c Mice: Role of Motor Activity and Endogenous Opioids, *Vargas-Pérez, H., Sellings, L. H. L., Paredes, R. G., Prado-Alcalá, R. A., & Díaz, J. L.*, 587–593.

The Role of Haptic Exploration of Ground Surface Information in Perception of Overhead Reachability, *Pepping, G.-J., & Li, F.-X.*, 491–498.

The Role of Stability in the Dynamics of Learning, Memorizing, and Forgetting New Coordination Patterns, *Tallet, J., Kostrubiec, V., & Zanone, P.-G.*, 103–116.

Sequential Processes for Controlling Distance in Multijoint Movements, *Schaefer, S. Y., & Sainburg, R. L.*, 325–336.

Short-Term Limb Immobilization Affects Motor Performance, *Moisello, C., Bove, M., Huber, R., Abbruzzese, G., Battaglia, F., Tononi, G., & Ghilardi, M. Felice*, 165–173.

Spatial Assimilation Effects in Sequential Movements: Effects of Parameter Value Switching and Practice Organization, *Sherwood, D. E.*, 232–245.

Structured Perceptual Arrays and the Modulation of Fitts's Law: Examining Saccadic Eye Movements, *Al-Aidroos, N., Fischer, M. H., Adam, J. J., & Pratt, J.*, 155–164.

Temporal Dissociation Between Distractors and Targets: The Impact of Residual Distractor Processing on Target Responses, *Kritikos, A., McNeill, J., & Pavlis, A.*, 29–42.

Time but not Force is Transferred Between Ipsilateral Upper and Lower Limbs, *Christou, E. A., & Rodriguez, T.M.*, 186–189.

Treadmill Gait Analysis Does Not Detect Motor Deficits in Animal Models of Parkinson's Disease or Amyotrophic Lateral Sclerosis, *Guillot, T. S., Asress, S. A., Richardson, J. R., Glass, J. D., & Miller, G. W.*, 568–577.

The Use of Prescanning in the Parameterization of Sequential Pointing and Reaching Movements, *Wilmut, K., & Wann, J.*, 558–567.

Visual Guidance for Hand Advance but Not Hand Withdrawal in a Reach-to-Eat Task in Adult Humans: Reaching Is a Composite Movement, *de Bruin, N., Sacrey, L.-A. R., Brown, L. A., Doan, J., & Whishaw, I. Q.*, 337–346.
